

Energy Efficiency Solutions With No Upfront Capital

Retrofit for Efficiency and Stability

For most businesses, energy is one of the top five expenses affecting bottom lines. It can be challenging however to effectively manage usage, identify the right efficiency upgrades, *and* find the best payment structure for executing projects in a way that will help your business achieve its energy goals. That's why Constellation created Efficiency Made Easy® (EME)—a solution that can play an integral role in achieving your strategic financial and environmental goals.

As you think about your electricity or natural gas supply requirements, imagine reducing your total energy budget and usage at the same time through high-impact energy conservation measures. With EME, our team of experts will identify and retrofit for efficiency measures.

This unique award-winning solution provides an opportunity to pay for these conservation measures—with no upfront capital—through monthly charges that appear on your competitive power or gas supply bill from Constellation. You can realize cost savings through a reduction in consumption and an improved load profile, which will positively impact future energy costs and the ability to meet environmental goals over time.

Constellation and Rich Energy Solutions are working together to provide building assessments with the ability to fund energy conservation measures in support of organizational and environmental goals.

Company Description

The Rich family of Rich Energy Solutions, LLC. (RES) has provided mechanical construction and energy saving solutions since 1918. RES has assisted clients in all industries to deploy EME and help reduce energy costs, as well as greatly improve customer lighting and mechanical systems leading to improved comfort, safety and productivity.

RES conducts free, no-obligation building assessments to qualified customers to develop a cost savings analysis, system design, and provides turnkey installation of all energy conservation measures. RES has energy conservation experience ranging from small to large HVAC efficiency upgrades, wireless building management systems, and LED lighting system upgrades to large-scale projects such as displacing city steam and co-generation plants and much more.

“Before the mechanical and lighting upgrades, the air conditioning unit never stopped running. Now it cycles off regularly. The improved light levels have really helped our quality and inspection process, as well as production.”

Rick Adkins
Quality Control Manager, Kingsbury Inc.

Products to Help You Buy, Manage and Use Your Energy

Electricity

- Fixed Price Solutions
- Secured Solutions
- Flexible Index Solutions
- Block Solutions
- Peak Load Management
- Minimize Volatile Pricing (MVPe) Program
- Information to Implementation (i2i)
- Transparency Product
- Custom Forecast Solution
- MarketWatch

Natural Gas

- SmartPortfolio Program
- Minimize Volatile Pricing (MVP) Program
- Manage Portfolio Service (MPS) Program
- Energy Manager
- Fixed Price
- Fixed Basis
- NYMEX Lock
- Index

CPower Load Response

- Automated Load Control
- Demand Response
- Ancillary Services
- Economic Programs

Renewable Energy

- Solar
- Renewable Energy Certificates (RECs)
- Carbon-Free Product
- Generation Development

Energy Efficiency

- HVAC Infrastructure
- Building Automation & Analytics
- Lighting & Controls
- Water Conservation
- Retro-Commissioning
- Measurement & Verification (M&V) Services
- Efficiency Made Easy
